SUMMARY

Proactive **Software Engineer** with over **3.6 years** of experience in **front-end** development, specializing in **React.js**. Adept at building intuitive, user-centric interfaces and collaborating with cross-functional teams to deliver high-quality software. Passionate about technology trends, clean code, and innovative problem-solving.

SKILLS

- **Databases:** MySQL, MongoDB
- **Programming:** JavaScript (ES6+), TypeScript, React.js, Redux, React Query, Next.js, Angular.js, Node.js, Express.js, REST APIs, HTML5, CSS3, Tailwind CSS, Git, GitHub, Agile, Jira, Responsive Design, React Native
- **Dev Tools & Version Control:** Chrome Developer Console, GitHub, Bitbucket
- **Others:** responsive design, debugging, Agile development, Chrome Extension
- **Operating Systems:** macOS, Linux, Windows

EXPERIENCE

LIGHTHOUSE LEARNING PRIVATE LIMITED | SOFTWARE ENGINEER | MUMBAI | JAN, 2022 | PRESENT

- Joined the company through campus placement after completing MCA; promoted from **Software Engineer Trainee** to **Software Engineer** within the first year due to strong performance and consistent contributions.
- Developed and maintained **15+ full-stack features** using **Java Spring Boot** and **React.js**, improving system performance and user experience.
- Led the **front-end architecture** of multiple modules after transitioning to a frontend specialization, contributing to a **20% increase in page performance** and **15% reduction in bug reports**.
- Conducted **20+ technical interviews** to assess and recruit junior developers, playing an active role in the talent acquisition process.

PROJECTS

KANGAROO KIDS WEBSITE AND CONTROL PANEL

- Developed a high-performance website enabling dynamic microsite management via a custom control panel. Achieved **fast page load times** and significantly **enhanced user experience** across all pages.

HOMEBUDDY APP AND WEBSITE

- Maintained and enhanced front-end components of a Learning Management System (LMS).
- Implemented new features and optimized legacy code, leading to a **20% reduction in code size** and improved **maintainability and performance**.

ARGUS APP AND WEBSITE

- Built scalable front-end components for a **multi-tenant LMS** using a modular architecture.

- Achieved a **40% reduction in code duplication** through reusable components.

EUROBUDDY CHATBOT - Awarded for this project

- **Spearheaded the development of a solo front-end PWA chatbot** with advanced AI features, built for a hackathon, showcasing expertise in modern JavaScript, responsive design, and intelligent UI behaviour.

TALK2TEACHER - Awarded for this project

- Developed a front-end interface for seamless online Parent-Teacher Meetings, fully integrated into the Argus platform to enhance user experience and communication efficiency.

EDUCATION

- **Bachelor of Computer Science | May, 2020 | G N Khalsa College, Matunga**
- **Master of Computer Applications | May, 2022 | SIES College of Management, Nerul**

CERTIFICATIONS

- **Big Data Computing | Nptel | 2020**
- **Cloud Computing | Nptel | 2020**
- **React Native | Udemy | 2024**

ACHIEVEMENTS & AWARDS

- **Eurobuddy** - Hackathon 2024 | Daman
- **Talk2Teacher** - Hackathon 2025 | Thailand
- **Child Centricity** - 2025 | Thailand

KEY TECHNICAL INTEGRATIONS

ZOOM & JITSI INTEGRATION

- Integrated Zoom and Jitsi video conferencing into the Argus platform to enable **nationwide masterclasses** and virtual learning sessions.

SOCKET.IO

- Implemented real-time communication during Zoom sessions using **Socket.io**, enabling teachers to send MCQs and receive student responses live, enhancing **interactivity and assessment**.

CLEVERTAP

- Integrated **CleverTap** to track user behaviour, feature adoption, and engagement metrics, enabling **data-driven product improvements**.

MENTION FEATURE

- Developed a **custom user tagging system** within the communication module of the Argus platform, enhancing collaboration and targeted notifications.
